JACK Standard Wood Finishes

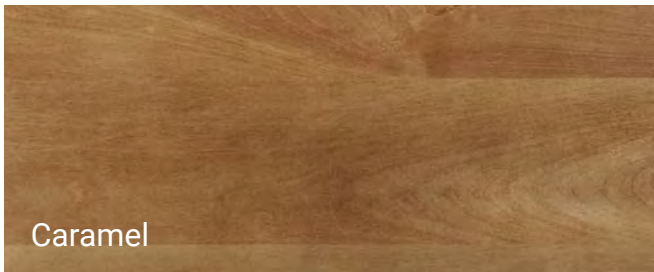

Our game tables and chairs are made from kiln-dried, 100% solid Maple hardwood. After a thorough sanding, wood is treated with a non-grain rasing (NGR) solution to equalize the tones of the natural wood. After a careful application of stain, the wood is then sealed with a post-catalyzed conversion varnish to seal out moisture and add visual depth and clarity to the finish. After the sealer has dried, it is sanded again for a smooth fiish and given a further topcoat of post-catalyzed conversion varnish.
