

Why Jack Game Room
Billiard Tables Are Best

Overview

Our factory in Northern California has been in operation since 1953. We are considered a worldwide leader in the design and manufacture in of premium, made-to-order game room furniture. Our wide assortment of table styles and seating are available matching wood finishes, felts and upholstery for a completely custom look.

Wood & Finishing Basics

Our game tables and chairs are made from kiln-dried, 100% solid Canadian maple hardwood. All styles are optionally available in oak or walnut. After a thorough sanding, wood is treated with a non-grain rasing (NGR) solution to equalize the tones of the natural wood. After a careful application of stain, the wood is then sealed with a post-catalyzed conversion varnish to seal out moisture and add visual depth and clarity to the finish. After the sealer has dried, it is sanded again for a smooth fiish and given a further topcoat of post-catalyzed conversion varnish.

Felt, Bumpers & Sights

We use Championship Invitational 4066 felt with Teflon® coating. This is a premium 20 oz. blend of 75% worsted wool and 25% nylon that combines playability and durability. We offer 13 standard felt color options on any table.

Our bumpers are an industry-standard K66 profile in 72% natural gum rubber with a 48-52 durometer. These profiles are guaranteed +/- 4/1000ths of an inch variance. All tables come standard with diamond shape pearlized mother-of-pearl sights.

Pockets

Our pockets are the finest in the industry. We manufacture our own using 100% vegetable-tanned leather rather than the bonded leather used by competitors. We also include a black walnut dowel in the bottom of our pockets to create that pleasing “click” sound.

Black leather pockets come standard although brown leather pockets are available on request. Likewise, all tables come with “internal” pockets by default but many of our models are available with “external” (exposed) pockets on special order.

Slate

All our billiard tables feature a three-piece matched set of 1” thick diamond-honed, wood-backed slate. This ensures a pefiect fit and a true roll.

Chassis

Our internal chassis construction provides a direct, solid hardwood link between the slate and the ground. Because the one-piece chassis is fully assembled and precision leveled at the factory using massive 8/4 hardwood with mortise and tenon joinery, all bolts are eliminated except the few through-bolts fastening the legs to the chassis itself. Assembly is easier, faster, stronger and more accurate.

Delivery & Installation

We do all the work! We have a nationwide network of installation professionals available to assemble, level and tune your table. Leave it to us and we will make all the arrangements.

Styles

We offer nine completely unique and proprietary designs in hardwood maple. Each can be customized with any one of eight standard wood finishes and 13 felt colors. Custom match finishes are available at an upcharge, as are tables constructed in oak or walnut.
